

MILESTONE KITE™

Simple, secure, and scalable cloud video security

The simple way to secure your business

Looking for an easy-to-use video security solution that doesn't take up your time? Milestone Kite™ is the answer.

It's cloud-delivered so it is easy to run, accessible from anywhere, and you don't have to worry about maintenance. It's also an open solution, giving you the freedom to choose from more than 25,000 devices* and a variety of value-adding analytics. Your day is busy enough, so Milestone Kite has security covered while you focus on the rest.

Simple

Spend your time on what really matters

Focus on your business, instead of managing your security system. Milestone Kite is easy to set up, manage, and update; and it can be monitored from anywhere.

Secure

Keep your business safe

Enjoy peace of mind. Protect people and assets with a reliable video solution that safeguards against theft, vandalism and more.

Scalable

Expand your solution with ease

Choose from thousands of devices, expand to new sites, and add extra access control and analytics functions.

Cost reducing

Save on lifecycle costs

From a low up-front investment to low costs throughout the lifecycle of the product, Milestone Kite saves your business time and money.

Adapts to your needs

Milestone Kite™ is a VSaaS (Video Surveillance as a Service) security solution. It allows you to flexibly choose between different deployment options depending on your needs and site requirements and centrally manage your surveillance system through your Kite account.

Milestone Kite with Gateway

Whether you are looking to replace an existing VMS or setting up a new surveillance system you get the full set of features and functionalities with the Gateway connected option, that supports 25,000* devices, video analytics, access control and much more with video storage and retention in the cloud. Tailor your storage options to suit your needs, selecting between edge or cloud storage. With smooth integration into your current setup, it's a straightforward, economical choice if you're running a multi-location business like retail stores, hotels, or schools.

Milestone Kite Camera to Cloud

Milestone Kite Camera to Cloud simplifies surveillance for smaller or newly built sites. It works with Axis cameras and offers a powerful subset of AI-based analytics. With Camera to Cloud, all video processing, recording and storage take place on the cameras, which are connected and controlled through your Milestone Kite account. Not only does this setup slash bandwidth usage and costs, it also simplifies installation and upkeep. Ideal for businesses spread across multiple locations with fewer cameras, it's the go-to choice for ease of use, especially when on-site gateways aren't practical.

*ONVIF Profile S conformant devices. Please visit <https://www.onvif.org/conformant-products/> and select Profile S for a list of devices.

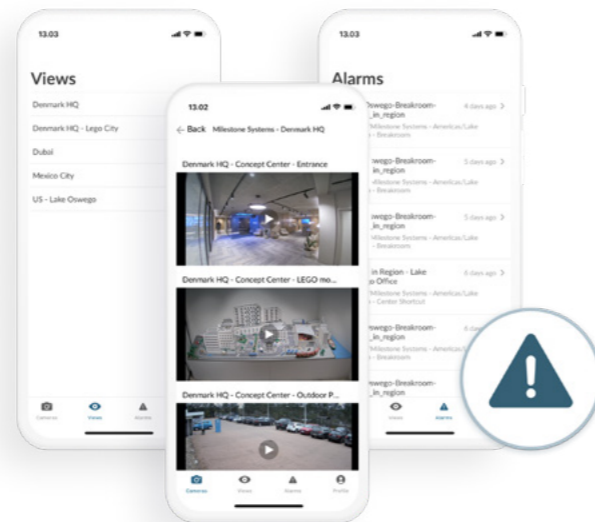

Maximize protection, minimize effort

Whether you are a small, medium-sized or multi-site business, Milestone Kite makes security simpler while giving you access to all the advantages of cloud technology.

Monitor from anywhere

You have enough to do beyond security, and Milestone Kite gives you the freedom to do it. Monitor your site on your computer, tablet or phone from wherever you are. Real-time notifications ensure you will be kept up to date on anything important.

- View cameras by site and location
- Get email, text, and push notifications
- Tap to view alarm events from any notification

Make access control easier

Make entry to your site as easy or hard as needed. With Milestone Kite Access Control integrations, you have complete, centralized control over your entry points with easily configured users, schedules and access levels. You can also create rules and alarms to trigger notifications so you can respond proactively to intrusions.

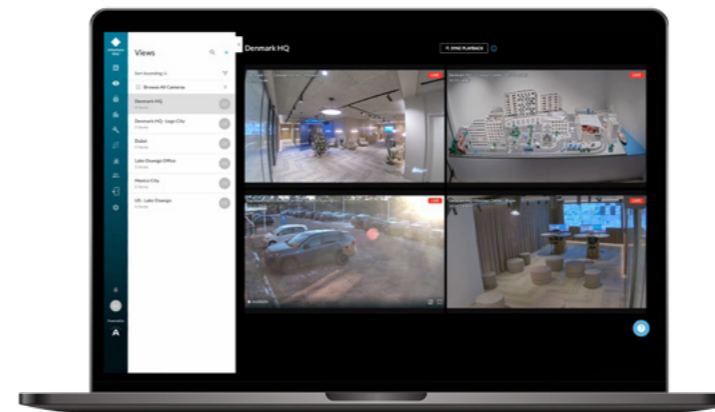

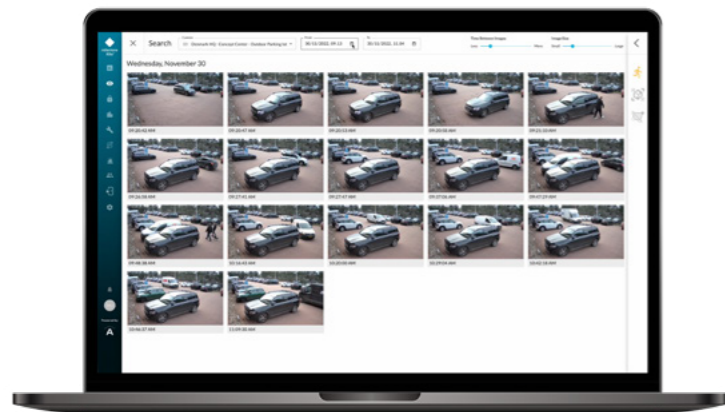

- Map live cameras directly to doors
- Lock, unlock and 'quick grant' doors from your dashboard
- Choose from cloud-based integrations

Have full situational awareness

Never miss a thing and ensure you are covered in the event of incidents or insurance issues. You get a complete overview of one or multiple sites from a single interface. Plus, you can review hours of footage in minutes and document incidents with the click of a mouse.

- See recorded and live video and listen to live audio
- Easily export and share footage
- Speed up video reviews with forensic search

Do more with analytics

Make better business decisions based on data, not guesses. Milestone Kite is compatible with a range of cameras with built-in analytics — or you can make any camera smart with cloud-based analytics. From simple visitor tracking to artificial intelligence and machine learning, you can improve your business insights.

- Use people counting and detection
- Employ heat maps and vehicle counting
- Identify people, vehicles and colors

Choose your installation type for any site requirement

Single site

Milestone Kite is an ideal plug-and-play option for businesses, institutions, and venues of all sizes. You can manage it yourself, and don't need to worry about updates, cybersecurity, and maintenance – these are automatic.

Multi-site

Businesses with two or more sites can keep a clear and centralized overview of their security. It is also easy to expand your security solution to new sites or temporary ones such as construction sites or social venues.

XProtect® + Kite Hybrid

Combine Milestone Kite with Milestone XProtect® in a hybrid setup for the best of both worlds. It's ideal for expanding your video coverage to dispersed sites with minimal effort, while gaining access to all live video, recordings and alarms, centrally from XProtect.
